1527 Greenup Avenue – Ashland, KY 41101

## Data Backup Services

### Offsite Backup

- Our Most Popular Option -

**High Performance Computer Services Off Site Backup - \$50 per month for up to 500GB**

-**High Performance Computer Services Offsite Backup** stores your valuable information on local, secure servers. If damage occurs to the server and backup located in your office due to a flood, fire, theft, etc., *High Performance Computer Services* will download your files from the backup server to an external hard drive and bring your files to your location.

-**Our server is located locally in Ashland, Kentucky. If your business suffers a crisis we can have you up and running within hours.** Offsite backup located across the country requires recovering and downloading all saved information which can take numerous days or weeks depending on download speeds.

-**Data is automatically backed up on a daily basis.** The skilled technicians at *High Performance Computer Services* are alerted if a backup does not occur at its scheduled time. Steps would be taken to immediately troubleshoot a problem if one were to occur.

### Local Backup

- One Time Cost for Your Location -

**Acronis Backup and Recovery 11 & Western Digital Hard Drive - \$1,200 one-time cost**

-**Acronis Backup and Recovery 11** is software that backs up your data in your own office. Acronis is excellent for keeping multiple copies of your information so you can restore all data from your server. You may also choose to only restore needed information from a particular range of dates.

-**Western Digital Hard Drive** is a high quality hard drive that will store all data from your server. This works in conjunction with the Acronis software to automatically keep your information securely backed up on a daily basis. *High Performance Computer Services* will select a specific hard drive that is large enough to hold all needed data.

-**This exceptional software and hardware combination** automatically backs up all data on a daily basis. The Acronis software reports back to the skilled technicians at *High Performance Computer Services* if a backup does not occur on the Western Digital hard drive at its scheduled time. Steps will be taken immediately to resolve any issues that may occur.

*We recommend an offsite & local backup working together to firmly protect your data.*
